

Meeting Agenda

Group meeting for The Grupp.
Participants: Eric, Sebastian
Date: 26/5-2018

1 Objectives

- Discuss what needs to be finished before the deadline.

2 Reports

- The program is largely finished, we have a functioning executable jar file as a demo.
- The SDD needs more work.

3 Discussion Items

- Task priority and assignments.

4 Outcomes and Assignments

Outcomes:

- The focus until midnight tomorrow will be on finishing the SDD.

Some assignments have been put down in priority, and will be addressed later if time allows.

- Finish a prototype to be showed at the presentation on Tuesday 29th.
- Solve memory leak issue.
- Solve audio based lag.
- Limit frame rate.

Assignments:

- Eric will look over the class descriptions in the SDD and implement them as comments into the project. He will also create UML diagrams for the SDD. Also proofread SDD.
- Sebastian will look over a complete UC list, update the STAN diagram, add a quality report section, add headers for the class descriptions and a description in regards to how the program is run and what is needed to run it.

5 Wrap Up

This will be our last documented meeting in regards to this Project, the projects deadline hits Sunday at midnight. The SDD and Project demo needs to be finished by then.
