Meeting Agenda

Group meeting for The Grupp.
Participants: Sebastian, Eric
Date: 30/4-2018

1   Objectives

- Discuss progress since last meeting.

- Create and assign tasks.

2   Reports

Some of the listed tasks issued by Joachim have been solved

- A structure using inheritance has been introduced to GUI objects.

- There are now some comments for some key areas in the code.

- An initial view for Level has been created.

- We now properly import libraries through maven.

The following tasks remain unsolved.

1. Use STAN Dependency analyzer and bring the results to then next meeting.

2. Start working on a Software Design document, prepare questions for next meeting.

3. Expand the model overall before next week.

4. Rename observer to listener.

5. A single service handling assets, images, sound and so on.

6. Have a working demo for the next meeting.

7. Start working on sound.

8. Have a good standard regarding work flow for the team, everyone needs to work form a branch and needs to be more careful in regards to what is committed to the repo.

3   Discussion Items

- Task priority and assignments.

4 Outcomes and Assignments

Outcomes:

- Tasks, 1, 2, 6 and hopefully 8 will be prepared during the meeting on Wednesday.

- Until the next meeting the main focus will be on task 3, expanding the model.

- The discussion regarding work flow will be held when all three project members meet once more.

Assignments:

- Sebastian will work on developing the Map view, model and loader.

- Eric will work on the Level model as well how the controller will interact with model.

5 Wrap Up

The assigned tasks should be finished by Wednesday, any merge conflicts will be handled at that date, ensuring the program is executable and uploaded to master. The focus for now is to have a solid model finished by the time we meet with Joachim.
